

Hospitality / Wellness

Forza più leggerezza, formati enormi e spessore sottile.

Un materiale innovativo ad alte prestazioni, ideale per tutte le superfici, arredi e finiture di hotel, spa, ristoranti.

Una soluzione globale per progettare scegliendo tra ispirazioni estetiche sempre di altissimo livello: effetto marmo, pietra, legno, metallo, cemento.

Strength plus lightness; thin slabs in enormous sizes.

An innovative high performance material perfect for all kinds of surfaces, furnishings and finishes in hotels, spas and restaurants.

A total solution for designs based on the most refined sources of aesthetic inspiration: marble, stone, wood, metal, concrete.

La force alliée à la légèreté, des formats géants et une grande finesse des épaisseurs.

Un matériau innovant aux prestations d'excellence, idéal pour toutes les surfaces : meubles et finitions d'hôtels, spa, restaurants.

Une solution globale pour créer en choisissant parmi un éventail de suggestions esthétiques, toujours de très haut niveau : effet marbre, pierre, bois, métal ou béton.

Kraft plus Stärke, große Formate und dabei ganz dünn.

Ein innovatives und hochleistungsfähiges Material, ideal für alle Oberflächen, Einrichtungen und Gestaltungen von Hotels, Spa und Restaurants.

Eine globale Lösung für eine Gestaltung, die aus ästhetischen Inspirationen höchsten Niveaus auswählen kann – Marmor-, Stein-, Holz-, Metall- und Zementoptik.

1 KNOW HOW

Un gruppo che da oltre 50 anni è il punto di riferimento mondiale nella ceramica tecnica per grandi progetti.

Un groupe référence mondiale de la céramique technique pour les grands projets depuis plus de 50 ans.

A group that for over 50 years has been the world-level reference point in technical ceramics for large projects.

Eine Gruppe, die seit über 50 Jahren weltweit führend auf dem Sektor der technischen Keramik für große Projekte ist.

2 TECHNOLOGY

Forti investimenti per una struttura produttiva e logistica all'avanguardia, per offrire il meglio come qualità e design di prodotto e seguire forniture di qualsiasi entità in qualsiasi nazione.

De gros investissements pour une structure de production et de logistique d'avant-garde permettant de proposer des produits d'une qualité et d'un design d'excellence et d'effectuer des fournitures de n'importe quelle dimension partout dans le monde.

SERVICE
AND EXPERIENCE
TO SUPPORT
ANY PROJECT

3

3 SERVICE

Heavy investments for an avant-garde production and logistic structure, so as to offer the best in terms of quality and product design and to follow supplies of any size in any country.

Starke Investitionen in eine absolut fortschrittliche Produktions- und Logistikstruktur, um beste Qualität und Produktdesign zu bieten und dabei Lieferungen jeder Größenordnung in der ganzen Welt vornehmen zu können.

Un reparto assistenza per progetti speciali che da decenni fornisce un servizio senza eguali, collaudato nei cantieri più impegnativi del mondo.

Un service d'assistance pour les projets spéciaux qui assure depuis des dizaines d'années des prestations uniques et ayant fait leur preuve sur les chantiers les plus contraignants du monde.

A service department for special projects that for decades has been providing unequalled service, put to the test at the most demanding sites in the world.

Der Kundendienst für Spezialprojekte, der seit Jahrzehnten einen unvergleichlichen Service bietet, der auf den schwierigsten Baustellen der Welt geprüft wurde.

Lastre in ceramica tecnica grandi, sottili, inalterabili: un'unica materia per rivestire di bellezza le zone wellness.

Grandeur, finesse et inaltérabilité des dalles en céramique technique : une seule matière pour sublimer la beauté des espaces bien-être.

/ X-large slabs

UP TO 320x160 CM 0,6 CM
PERFECT FOR
WELLNESS AREAS

Large, thin, unalterable high-tech ceramic slabs: a single material for covering surfaces in wellness centres with beauty.

Große, dünne und unverwüstliche Keramikplatten: ein einziges Material, um Wellness-Bereiche schön zu verkleiden.

DESIGN WITH SHAPES

1 DOOR & CLOSET

Porte, sportelli e armadi: spessore ridotto e lavorabili in costa.

Doors, cabinets and closets: thin and workable vertically.

Portes, battants et placards : épaisseur réduite et chants travaillables.

Türen, Klappen und Schränke: dünn und auch seitlich zu verarbeiten.

2 BATHROOM VANITY TOP

Top bagno, dove le venature avvolgono i volumi, grazie a una posa attenta.

Bathroom counter tops, carefully laid so that the veins wrap around volumes.

Plans de salle de bain sur lesquels, grâce à une pose attentive, les veines enveloppent les volumes.

Badezimmertops bei denen die Maserungen dank einer sorgfältigen Verlegung die Volumen umhüllen.

3 FURNITURE IN / OUTDOOR

Arredi interni ed esterni: tavoli, panche, fioriere.

Indoor and outdoor furniture: tables, benches, flowerbeds.

Meubles d'intérieur ou d'extérieur : tables, bancs, jardinières.

Einrichtung im Innen- und Außenbereich: Tische, Bänke, Pflanzkübel.

Appearance that does not change in time

Estetica inalterabile nel tempo

Une beauté inaltérable dans le temps

Unveränderliche Schönheit im Laufe der Zeit

Withstands sun and weather

Resiste al sole e alle intemperie

Résiste au soleil et aux intempéries

Sonnen- und witterungsfest

Perfectly sanitisable

Perfettamente igienizzabile

Parfaitement hygiénisable

Lässt sich perfekt desinfizieren

Withstands scaling, moisture and stains

Resiste a incrostazioni, umidità, macchie

Résiste aux incrustations, à l'humidité, aux taches

Widersteht Ablagerungen, Feuchtigkeit und Flecken

Eccezionalmente resistente e compatto, mantiene inalterata la sua bellezza nel tempo, offrendo la massima versatilità d'uso.

Exceptionnellement résistant et compact, ce carrelage conserve sa beauté dans le temps tout en assurant une flexibilité d'utilisation maximale.

/ High performance

TIME-PROOF BEAUTY,
GREAT VERSATILITY

A single material for floors, walls and furnishings

Un solo materiale per pavimenti, pareti e arredi

Une seule matière pour les sols, les murs et les meubles

Nur ein Material für Boden, Wand und Einrichtung

Drastic reduction of grouting where dirt can collect

Drastica riduzione delle fughe che trattengono lo sporco

Réduction drastique des joints retenant la saleté

Drastische Reduzierung der Fugen, in denen sich Schmutz ansammelt

A range that covers all the needs of the project

Una gamma che copre tutte le esigenze del progetto

Une gamme qui répond à toutes les exigences des projets

Eine Palette für alle Gestaltungsbedürfnisse

Exceptionally resistant and compact, its beauty remains unaltered in time, offering the maximum versatility of use.

Besonders resistent und kompakt, auch im Laufe der Jahre gleichbleibend schön, mit maximaler Vielseitigkeit im Einsatz.

Large-size slabs and modular formats for any floor and wall, but also to dress design.
Everything can be made: from the walls of a skyscraper to a garden table.

Maxiplatten und modulare Formate für jede Art von Fußboden und Verkleidung, ideal auch für Design.
Hier kann man alles machen, von den Wänden eines Hochhauses bis zum Gartentisch.

ACTIVE™

CLEAN AIR & ANTIBACTERIAL CERAMIC

EXTRA LARGE

L'UNICA CERAMICA AL MONDO PER PAVIMENTI E RIVESTIMENTI
ANTINQUINANTE E BATTERICIDA
CERTIFICATA ISO 10678, ISO 27448-1 E ISO 27447

THE ONLY FLOOR AND WALL CERAMICS IN THE WORLD
ANTI-POLLUTION AND BACTERICIDAL
CERTIFIED BY ISO 10678, ISO 27448-1 AND ISO 27447

LA SEULE CÉRAMIQUE AU MONDE POUR SOLS ET MURS
ANTIBACTÉRIENNE ET ANTIPOLLUTION
CERTIFIÉE ISO 10678, ISO 27448-1 ET ISO 27447

DIE EINZIGE KERAMIK AUF DER WELT FÜR BODEN -
UND WANDVERKLEIDUNGEN UMWELTFREUNDLICH UND BAKTERIENTÖTEND
ZERTIFIKATION ISO 10678, ISO 27448-1 UND ISO 27447

EFFICACIA ANTINQUINANTE 100 mq Active = 30 alberi

In 6 ore, 100m² di ceramica Active depurano l'aria dagli Nox come 30 alberi o arbusti con una quantità di foglie pari a 22m²

(New Phytol 103 (1986) 199)

ANTI-POLLUTION EFFECTIVENESS 100 sq. m. Active = 30 trees

In 6 hours, 100m² of Active ceramic cleans as much NOx from the air as 30 trees or shrubs with a quantity of leaves amounting to 22m²

(New Phytol 103 (1986) 199)

EFFICACITÉ ANTIPOLLUTION 100 m² Active = 30 arbres

En 6 heures, 100 m² de céramique Active purifient l'air en détruisant les Nox comme le feraient 30 arbres ou arbustes ayant une quantité de feuilles égale à 22 m²

(New Phytol 103 (1986) 199)

UMWELTSCHUTZLEISTUNG 100 m² Active = 30 Bäume

In 6 Stunden reinigen 100 m² Keramik die Luft und entfernen genauso viel Nox wie 30 Bäume oder Büsche mit einem Laubwerk von 22 m²

(New Phytol 103 (1986) 199)

EFFICACIA BATTERICIDA

Nella nostra vita veniamo quotidianamente a contatto con un certo numero di batteri. Active li elimina tutti!

ANTIBACTERIAL EFFECTIVENESS

In our everyday lives we constantly come into contact with a lot of bacteria. Active gets rid of them all!

EFFICACITÉ ANTIBACTÉRIENNE

Nous sommes chaque jour en contact avec un certain nombre de bactéries. Active les supprime toutes !

BAKTERIENTÖTENDE WIRKUNG

Jeden Tag kommen wir mit einer gewissen Anzahl von Bakterien in Kontakt. Mit Active werden sie alle abgeschafft!

EFFICACIA AUTOPULENTE Idrofilia – minor uso

La rimozione dello sporco risulta considerevolmente agevolata, con conseguente riduzione della necessità di sostanze detergenti.

SELF-CLEANING EFFECTIVENESS Hydrophilic – less use

Removing dirt ends up being a lot easier, with a consequent reduction in the need for detergents.

EFFICACITÉ AUTONETTOYAGE Hydrophilie – usage réduit

La suppression de la saleté est considérablement facilitée, ce qui réduit du même coup le besoin de substances détergentes.

SELBSTREINIGENDE WIRKUNG Hydrophil – geringer Einsatz

Der Schmutz kann einfach mit geringen Reinigungsmittelmengen entfernt werden.

EFFICACIA ANTIODORE Benefici della fotocatalisi

NO CATTIVI ODORI

Miglioramento della qualità dell'aria grazie a una sensibile riduzione degli inquinanti tossici e degli odori derivanti dallo sporco.

ANTI-ODOUR EFFECTIVENESS Benefits of photocatalysis

NO BAD SMELLS

Better quality air thanks to a considerable reduction in the toxic pollution and the odours produced by dirt.

EFFICACITÉ ANTI-ODEUR Les bienfaits de la photocatalyse

PAS DE MAUVAISES ODEURS

Amélioration de la qualité de l'air grâce à une réduction sensible des polluants toxiques et des odeurs provenant de la saleté.

GERUCHBEKÄMPFUNG Vorteile der Fotokatalyse

KEINE GERUCHBILDUNG

Verbesserung der Luftqualität dank einer starken Verringerung der giftigen Schadstoffe und der auf Schmutz zurückzuführenden Geruchbildung.

Design inspiration

La mission di FMG è produrre materiali che rappresentino il massimo della bellezza, garantendo una disponibilità e una qualità che la pietra in natura non potrebbe offrire.

Block A e Block B sono due lastre che permettono di riprodurre l'effetto del marmo "a macchia aperta" con venatura speculare.

È un effetto che in natura è decisamente raro e prezioso, perché richiede una speciale lavorazione, partendo da particolari blocchi selezionati.

Questi prototipi di bellezza "ideale", finora riservati a edifici di lusso, sono oggi disponibile con continuità grazie all'avanguardia tecnologica MAXFINE.

IMPIEGO

Le lastre Block A-Block B possono essere posate a coppie, orientandole come in foto o capovolte. Sono utilizzabili anche con composizioni multiple, replicando il modulo più volte.

La mission de FMG est de produire des matériaux d'une beauté maximale tout en garantissant une disponibilité et une qualité que la pierre naturelle ne pourrait pas offrir.

Les deux carrelages grands formats Block A et Block B permettent de reproduire l'effet du marbre au veinage spéculaire dit « à livre ouvert ».

Un effet particulièrement rare et précieux dans la nature étant donné qu'il exige une fabrication spéciale à partir de blocs sélectionnés.

Ces prototypes d'une beauté « idéale », réservés jusqu'à maintenant aux édifices de luxe, sont aujourd'hui disponibles en permanence grâce à l'avant-garde technologique MAXFINE.

UTILISATION

Les carrelages grands formats Block A-Block B peuvent être posés deux à deux soit en les orientant comme sur la photo soit en les retournant. En répliquant le module plusieurs fois, ils peuvent aussi être utilisés dans des compositions multiples.

MARMI CALACATTA

300x150 . 120"x60"
BLOCK A
BLOCK B

MARMI BIANCO VENATO EXTRA

300x150 . 120"x60"
BLOCK A
BLOCK B

FMG's mission is to produce materials that are the tops in beauty, guaranteeing availability and quality such that stone, in nature, would be unable to offer. Block A and Block B are two tiles that enable the effect of "book-matched" marble with mirror-image veining. This effect is definitely rare in nature and precious as it requires special processing, starting out from particular selected blocks. These prototypes of "ideal" beauty, set aside so far for luxury buildings, are now available on a continuous basis thanks to MAXFINE avant-garde technology.

USE

Block A and Block B tiles can be laid in pairs, positioning them as shown in the photograph or turned upside down. They can also be used with multiple compositions, replicating the module more than once.

Die Mission von FMG ist es Materialien herzustellen, die ein Maximum an Schönheit mit der Verfügbarkeit und einer Qualität kombinieren, die der Naturstein niemals bieten kann. Block A und Block B sind zwei Platten, mit denen man den Effekt des Marmors "a macchia aperta" („offenes Buch“) mit spiegelgleicher Maserung reproduzieren kann. Es handelt sich um einen Effekt, der in der Natur sehr selten und wertvoll ist, denn hier bedarf es einer speziellen Verarbeitung, bei der von besonderen und ausgewählten Blöcken ausgegangen wird. Diese Prototypen der "idealen" Schönheit, die bisher den Luxusbauten vorbehalten war, gibt es heute – dank des technologischen Fortschritts von MAXFINE - kontinuierlich.

VERWENDUNG

Die Platten Block A-Block B können paarweise verlegt werden, indem sie wie im Bild ausgerichtet werden oder aber auch auf dem Kopf. Sie lassen sich auch bei Mehrfachkompositionen im Quadrat oder in der Reihe benutzen, wobei das Modul mehrere Male wiederholt wird.

PULIZIA E MANUTENZIONE

Premessa_Tutti i materiali FMG sono di facile pulizia e di semplice manutenzione. Una pulizia adeguata ne valorizza le caratteristiche estetiche donando ad ogni pavimento un'eccezionale brillantezza.

Pulizia iniziale_È di basilare importanza e deve essere effettuata immediatamente dopo la posa, per eliminare completamente i residui cementizi derivanti dalle malte, i residui di collanti e i residui epossidici che possono provenire dalle fughe. Viene consigliato l'uso di un prodotto acido, tipo FMG CLEAN a concentrazione 1:1. Strofinare energicamente e, dopo la pulizia, risciacquare abbondantemente con acqua pulita, per asportare tutte le tracce del detergente utilizzato. Queste operazioni sono indispensabili per tutte le collezioni FMG.

Manutenzione e cura_Grazie al procedimento produttivo impiegato (alte temperature di cottura, materie prime di qualità e processo di sinterizzazione) la superficie dei materiali FMG è praticamente impermeabile (assorbimento d'acqua minimo). Pertanto anche la sporcizia non può penetrare ma deve soltanto essere asportata dalla superficie del materiale. In questa operazione si sconsiglia di utilizzare detergenti contenenti cere o prodotti ceranti onde evitare la formazione di strati untuosi; per la scelta del detergente più appropriato, fare riferimento ai capitoli seguenti.

Consigli generali_Per grandi superfici soggette a carichi di sporco notevoli, quali aeroporti, ospedali, supermercati e luoghi pubblici ad alta intensità di traffico, si rendono indispensabili macchine per la pulizia con aspirazione dei liquidi di lavaggio. Ciò permetterà di ottenere non solo una pulizia profonda ma anche l'asportazione dei liquidi contenenti la sporcizia: in tal modo viene evitata la formazione di patine o pellicole altrimenti molto difficili da asportare. Al fine di preservare le superfici dallo sporco e dalle lavorazioni di cantiere, a posa terminata le pavimentazioni, in particolar modo quelle realizzate con materiali levigati, devono essere adeguatamente protette con truciolare o altri materiali idonei. In tal modo sarà possibile evitare danneggiamenti provocati da lavorazioni successive.

Sui materiali FMG possono essere utilizzati tutti i detergenti esistenti sul mercato alla concentrazione indicata; è escluso l'acido fluoridrico (HF) e tutti i suoi composti, come da norma UNI-EN 176. La concentrazione del detergente deve essere sempre la più bassa possibile, sia per contenere i costi che per velocizzare la manutenzione. Per pavimenti sopraelevati si consigliano prodotti lucidati o levigati in formati grandi in modo da effettuare operazioni di manutenzione a secco, o con un minimo utilizzo di liquidi. Una volta ultimata la posa in opera è necessario effettuare una pulizia iniziale approfondita della pavimentazione con prodotti idonei.

Detergenti_Indispensabili per preparare perfettamente la base nella posa su vecchio pavimento (FMG Neat), o per rimuovere ogni traccia di lavorazione dai materiali posati (FMG Clean).

Materiali naturali_Per questi materiali, dopo aver effettuato le operazioni specificate nella sezione "Pulizia iniziale" è sufficiente una normale manutenzione con una soluzione acquosa contenente piccole percentuali di un detergente alcalino, tipo FMG NEAT o Cif. Per questi tipi di superficie è sconsigliabile eseguire un trattamento impermeabilizzante: non essendoci alcuna porosità, l'impermeabilizzazione si depositerebbe soltanto sulla superficie in modo disomogeneo causando così effetti estetici disarmonici.

CLEANING AND MAINTENANCE

Introduction_All FMG materials are easy to clean and maintain. Regular cleaning highlights the aesthetic features of the material and gives the floor an exceptional shine.

Initial cleaning_The initial cleaning done immediately after the flooring laid is of essential importance for removing all mortar, adhesives and epoxy residues that may be left in the joints. In this initial phase, we recommend that you use an acid product such as FMG CLEAN, in a 1:1 concentration. Rub energetically to obtain the maximum cleaning. After washing the floor, which is just as important, rinse thoroughly with plenty of water to remove all traces of the detergent used. These steps are recommended for all FMG collections.

Maintenance and care_Thanks to the characteristics of the production process (high firing temperature, raw materials of great quality, sinterizing process), the surface of FMG material is waterproof (the water absorption is minimum). Therefore the dirt cannot penetrate but it is necessary to remove it from the surface. For this procedure do not use detergents containing waxes or waxing products, in order to avoid the forming of greasy layers; for choosing the most appropriate detergent refer to the following chapters. After the installation of floors, particularly of those made with polished materials, the surfaces should be adequately protected with particle board or other suitable materials in order to protect them from dirt and on-site processing. This prevents damage caused by subsequent processing

General recommendations_For commercial and heavily used surface areas such as airports, hospitals, supermarkets, and any public spaces with heavy foottraffic which are thus subject to considerable soiling, it is necessary to use automatic cleaning machines with suction of the washing liquids.

This allows not only deep cleaning, but also the continuous removal of liquids containing substances that cause soiling, thus preventing the formation of films which are very difficult to remove. Any detergent on the market can be used in the desired concentration for cleaning the high technology sinterized FMG products, with the exception of HYDROFLUORIC acid (HF) or its compounds, according to UNI-EN 176 standards. In order to keep costs limited and speed up maintenance operations, the concentration of the detergent must always be as low as possible. For raised floors we suggest to choose bright or polished surfaces in large sizes: these materials can be dry cleaned or with the minimum use of liquids. After the floor is laid it is necessary to make a very accurate initial cleaning with proper products.

Detergents_The detergents are essential when laying new materials on old floors and for preparing the support surface perfectly (FMG Neat) as well as after installation to remove all traces of cement, adhesive or sealant from the newly laid materials (FMG Clean). Use FMG Mineral to protect polished porcelain stoneware, to facilitate the removal of dirt.

Matt materials_For these materials, after completing the steps described in the section "Initial Cleaning", you only need to clean the floor with hot water containing small quantities of an alkaline detergent such as FMG NEAT or Cif. On these types of surface it is not advisable to apply a waterproofing product: the absence of porosity causes the waterproofing agent to deposit on the surface in an uneven way and to have unpleasant aesthetic effects.

EINIGUNG UND PFLEGE

Einleitung_Alle FMG Materialien sind einfach zu reinigen und pflegeleicht. Eine angemessene Reinigung wertet die ästhetischen Eigenschaften auf und verleiht jedem Boden einen außergewöhnlichen Glanz.

Erste Reinigung_Von entscheidender Bedeutung ist die Anfangsreinigung, die direkt nach dem Verlegen zu erfolgen hat, um aus dem Mörtel stammende Zementrückstände, Kleberrückstände sowie Epoxydrückstände der Fugen vollständig zu beseitigen. In dieser Phase wird die Verwendung eines säurehaltigen Produktes empfohlen zum Beispiel FMG CLEAN in einer Konzentration von 1:1. Für eine gründliche Reinigung muß kräftig gescheuert werden. Nach der Reinigung

ist das Spülen mit reichlich Wasser ebenfalls von großer Wichtigkeit, um alle Spuren des verwendeten Reinigungsmittels zu entfernen. Diese Arbeitsgänge sind für alle Kollektionen unverzichtbar.

Wartung und pflege_Dank des angewandten Prouktionsverfahrens (hohe Brenn-temperatur, qualitativ hochwertiges Rohmaterial und Sinterung) ist die Oberfläche der FMG Materialien praktisch völlig wasserabweisend (minimale Feuchtigkeitsaufnahme). Daher kann Schmutz auch nicht in die Oberfläche eindringen, sondern muß nur von der Oberfläche entfernt werden. Es ist davon abzuraten, dafür wachshaltige Reinigungsmittel oder Produkte zum Einwachsen zu verwenden, um die Bildung von öligen Schichten zu vermeiden.

In den nachfolgenden Abschnitten wird näher auf die Auswahl der geeigneten Reinigungsmittels eingegangen. Um die Oberflächen vor Verschmutzungen und Beschädigungen durch Bauarbeiten zu schützen, müssen die Bodenbeläge, insbesondere die aus geschliffenen Materialien, nach der Verlegung entsprechend mit Spanplatten oder anderen geeigneten Materialien abgedeckt werden. Auf diese Weise können Beschädigungen durch spätere Arbeiten vermieden werden.

Allgemeine Hinweise_Für grosse, bedeutende Oberflächen wie Flughäfen, Krankenhäuser, Supermärkte und andere öffentliche Bereiche mit hohem Verkehrsaufkommen, die daher auch einer starken Verschmutzung ausgesetzt sind, ist der Einsatz von automatischen Reinigungsmaschinen mit Absaugung der Reinigungsflüssigkeit unverzichtbar, da sie nicht nur eine tiefe Reinigung erlauben, sondern auch ständig die Flüssigkeit mit dem Schmutz entfernen und so die Bildung von eventuellen Schmutz-oder Schmierfilmen vermeiden, die immer schwer zu entfernen sind.

Auf den FMG Materialien, können alle auf dem Markt befindlichen Reinigungsmittel in der gewünschten Konzentration verwendet werden, mit Ausnahme von Fluorsäure (HF) oder ähnlichen Produkten, gemäss UNI-EN 176.

Die Konzentration des Reinigungsmittels muss aus Gründen der Kosten und der Schnelligkeit der Reinigung stets so gering wie möglich sein. Für die Doppelböden werden grossen Formate in glänzender oder geschliffener Ausführung empfohlen, so, dass eine trockene oder leicht feuchte Pflege ausreichend ist. Nach Abschluss der Verlegearbeit ist es notwendig, mit geeigneten Reinigungsmitteln eine gründliche Anfangsreinigung des Fussbodens durchzuführen.

Reinigungsmittel_Die Reinigungsmittel sind unabkömlich, sowohl wenn Sie das Material auf einem alten Bodenbelag verlegen wollen um den Untergrund vorzubereiten (FMG Neat), als auch um jede Spur von Zement, Kleber oder Fugenmörtel auf dem verlegten Material zu entfernen (FMG Clean). Verwenden Sie FMG Mineral für die Imprägnierung und die Reinigung des polierten Feinsteinzeugs.

Matt Materialien_Für diese Materialien ist, nachdem die im Kapitel "Anfangsreinigung" dargelegten Schritte durchgeführt wurden, eine gewöhnliche Wartung mit einer wässrigen Lösung, die einen kleinen Anteil alkalischen Reinigungsmittels (zum Beispiel FMG NEAT oder Viss) enthält, notwendig. Für diese Arten von Oberfläche ist von einer Wasserfestigkeitsbehandlung abzuraten; da die Oberflächen nicht porös sind, würde eine Wasserfestigkeitsbehandlung nur zu ungleichmässigen Ablagerungen auf der Oberfläche und damit zu einem optisch disharmonischen Eindruck führen.

NETTOYAGE ET ENTRETIEN

Avant-propos_Tous les matériaux FMG sont faciles à nettoyer et à entretenir. Un nettoyage adéquat met en relief les caractéristiques esthétiques, conférant à chaque sol un éclat particulier.

Nettoyage initial_Le nettoyage initial est d'une importance fondamentale et doit s'effectuer immédiatement après la pose pour éliminer totalement les résidus de ciment des mortiers, les résidus de colle et les résidus epoxy provenant des joints. Nous conseillons dans cette phase d'utiliser un produit acide, du type FMG CLEAN concentré à 1:1. Frottez énergiquement pour obtenir un nettoyage parfait.

Après le lavage, il est également important de rincer abondamment à l'eau claire pour éliminer toutes les traces du détergent utilisé. Ces opérations sont indispensables pour toutes les collections de FMG.

Entretien et soin_Grâce aux caractéristiques du procédé de production (hautes températures de cuisson, matières premières de qualité et procédé de grésage) la surface des matériaux FMG est pratiquement imperméable (l'absorption d'eau est minimum). Cela signifie que la saleté ne peut pas pénétrer mais doit seulement être retyrée de la surface du matériau. Pour cette opération on déconseille l'usage des détergents contenant de la cire ou des produits de cirage afin d'éviter la formation de couches de graisse ; pour le choix du détergent le plus approprié, lisez les chapitres suivants. Après avoir achevé la pose des sols, notamment ceux réalisés avec des matériaux polis, appliquer des panneaux de particules ou autres matériaux adéquats pour protéger comme il se doit les surfaces contre la saleté et les résidus de chantier. Il sera ainsi possible d'éviter que les opérations suivantes n'abîment le carrelage.

Conseils généraux_Pour les grandes et importantes surfaces comme les aéroports, les hopitaux, les supermarchés et les lieux publics à circulation très intense et qui par conséquent se salissent beaucoup, il est indispensable d'utiliser des machines automatiques de nettoyage qui aspirent les liquide de lavage. Vous obtiendrez non seulement un nettoyage profond mais vous éliminerez en permanence les liquides contenant les matériaux responsable de saleté et vous éviterez la formation de patine ou de pellicule qui sont toujours très difficiles à éliminer. Vous pouvez utiliser sur les matériaux FMG, produits de haute technologie et grésage, tous les détergents que propose le marché, à la concentration souhaitée, excepté l'acide fluorhydrique (HF) et ses composants, suivant les normes UNIEN 176. La concentration du détergent doit toujours être la plus faible possible pour réduire le coût et activer l'entretien. Pour les faux-planchers nous conseillons, dans les grands formats, les produits lustrés ou polis. En effet, nous recommandons un entretien à sec, ou avec un minimum de liquide. Quand la pose est terminée, il est nécessaire d'effectuer un nettoyage initial très approfondi avec les produits appropriés.

Les detergents_Les détergents vous seront indispensables aussi bien lorsque vous voudrez poser les carreaux sur un vieux sol, pour préparer une base parfaite (FMG Neat), que pour éliminer des carreaux posés toute trace de ciment, colle ou produit de jointoiement (FMG Clean). Utilisez FMG Mineral pour la protection et le nettoyage du grès cérame poli.

Materiaux non polis_Après avoir effectué les opérations décrites plus haut, un entretien normal suffit à ces matériaux, avec une solution aqueuse contenant un faible pourcentage de détergent alcalin, type FMG NET ou Cif. pour ces types de surface ni est pas recommandable de faire un traitement imperméabilisant : vu qu'ils ne sont pas poreuses l'argent imperméabilisant resterait sur la surface et causerait des effets esthetiques non harmonieux.

/ Weights and packing

	CASSA CON INTERFALDA 300x100: Ingombro: 324 x 115 x h.37 cm Peso: 100 kg Crate with padding layers 300x100: Size: 324 x 115 x37(H) cm Weight: 100 kg	300x100	16	-	48,00	776,00	- ordine minimo 3 lastre per cassa; - non sono ammessi più di 6 articoli (codici) differenti per cassa; carico su camion: - sovrapponibilità max. su camion n. 5 casse; - max. 32 casse su camion (8 spazi) compatibilmente con i limiti di peso totale; - possibilità di affiancare le casse l'una all'altra; - <i>minimum order: 3 slabs per crate;</i> - <i>no more than 6 items (codes) per crate allowed;</i> loading on lorry: - <i>stack max. 5 crates on lorry;</i> - <i>max. 32 crates on lorry (8 spaces) within total weight limits;</i> - <i>option of placing crates next to each other;</i>
	CASSA CON INTERFALDA 150x150: Ingombro: 172 x 163 x h.41 cm Peso: 66,5 kg Crate with padding layers 150x150: Size: 172 x 163 x 41(H) cm Weight: 66,5 kg	150x150	24	-	54,00	822,50	- ordine minimo 4 lastre per cassa; - in ciascuna cassa il numero di lastre per articolo deve sempre essere pari; - non sono ammessi più di 6 articoli (codici) differenti per cassa; carico su camion: - sovrapponibilità max. su camion n. 5 casse; - max. 28 casse su camion (7 spazi) compatibilmente con i limiti di peso totale; - possibilità di affiancare a ciascuna pila nr. 1 europallet; - <i>minimum order: 4 slabs per crate;</i> - <i>each crate must always contain an even number of slabs per item;</i> - <i>no more than 6 items (codes) per crate allowed;</i> loading on lorry: - <i>stack max. 5 crates on lorry;</i> - <i>max. 28 crates on lorry (7 spaces) within total weight limits;</i> - <i>option of placing 1 euro-pallet next to each stack;</i>

NOTE

- Il peso di casse e cavalletti è suscettibile di variazioni sensibili in base allo stato di umidità al momento della misurazione del peso;
- carico su camion: l'indicazione del numero massimo di casse è riferito ad un pianale unico di 13,6 x 2,45 m, compatibilmente con il peso; per camion di dimensioni differenti occorre riformulare il calcolo sulla base dello spazio e del volume delle casse;
- Carico su camion: per la sovrapponibilità di casse alte e basse non oltrepassare l'altezza max. del numero di casse alte indicate per ciascun formato;
- Imballo in casse alte / basse / pallet: a parità di articolo (codice) ordinato, le casse vengono via via riempite secondo l'imballo di massima capienza (es: ordine 90 mq articolo XYZ in formato 150x75 cm sarà imballato con nr. 1 cassa alta contenente 58,5 mq + nr. 1 cassa alta per 31, 5 mq);
- Reso delle casse: Il cliente avrà la facoltà di restituire le casse addebitate in fattura, franco stabilimento Ariostea. Personale autorizzato accerterà lo stato delle casse rese e compilerà il modulo di reso esclusivamente per le casse integre e complete dei quattro dischi metallici (bulldog) posti su ciascun angolo. Non possono essere resi né cavalletti, né pallet.

NOTE

- The weight of the crates and racks is subject to significant variations based on the moisture content at the time the weight was measured;
- Loading on lorry: the specified maximum number of crates refers to a single 13.6 x 2.45 m platform, within weight limits; for lorries of different sizes, calculation must be made based on the space and volume of the crates;
- Loading on lorry: to stack tall and short crates, do not exceed the maximum height for the number of tall crates specified for each format;
- Packaging in pallets/tall/short crates: for the same item (code) ordered, the crates are gradually filled according to the package of maximum capacity (e.g.: an order of 90 sq.m. of item XYZ in format 150 x 75 cm will be packaged in 1 tall crate containing 58.5 sq.m. + 1 tall crate containing 31.5 sq.m.);
- Crate return: the customer will have the option of returning the crates billed on the invoice, ex-factory Ariostea. Authorised employees will check the conditions of the returned crates and will fill out the return form, exclusively for undamaged crates that include the four toothed metal discs placed on each corner. Racks and pallets cannot be returned.

- 6 crates 300x150; - 10 crates 300x100 + 5 crates 150x150; - 10 crates 300x100 + 10 tall crates 150x100; - 10 crates 300x100 + 6 tall crates 75x37.5\75x75\150x75; - 10 crates 300x100 + 12 tall crates 100x100; - 15 crates 150x150 + 3 tall crates 75x37.5\75x75\150x75; - 27 tall crates 100x100 (within weight limits); - 18 tall crates 75x37.5\75x75\150x75; - 18 tall crates 150x100.

NOTE
Per la **sovrapponibilità di casse alte e basse** della medesima dimensione occorre rispettare il limite di altezza massima della pila pari a 2,10 m, tenendo presente che il carrello elevatore per il carico dei container non può sollevarsi oltre 1,40 m all'interno del container stesso.

NOTE
Concerning the **stackability of tall and short crates** of the same size, the maximum stack height of 2.10 m, should be respected, bearing in mind that the lift truck for loading the container cannot lift above 1.40 m inside the container itself.

En plus de sa documentation papier, Iris FMG met à disposition une riche bibliothèque en ligne proposant du matériel pouvant immédiatement être consulté ou téléchargé avec n'importe quel appareil.

- site Internet
- brochures téléchargeables au format PDF
- manuels techniques téléchargeables au format PDF
- tutoriels vidéo
- applis

Außer den Unterlagen auf Papier stellt Iris FMG auch eine reich bestückte Online-Bibliothek zur Verfügung, deren Material Sie sofort ansehen und auf jede Vorrichtung herunterladen können.

- Website

LASTRE IN CERAMICA TECNICA CON LE CARATTERISTICHE DEL PORCELLANATO FULL-TECHNICAL CERAMIC SLABS WITH THE CHARACTERISTICS OF PORCELAIN

Classificazione secondo le norme UNI EN 14411 gruppo Bla o ISO 13006 Allegato G gruppo Bl a UGL
Classification in accordance with UNI EN 14411 standards Bla group or ISO 13006 Annex G standards Bl a UGL group

* I prodotti con assorbimento < 0,5 sono classificati secondo le norme UNI CEN “Fully vitrified tiles” e secondo le norme ASTM “Impervious tiles”
The products having an absorption < 0,5 are classified according to the UNI CEN standards “Fully vitrified tiles” and according to the ASTM standards “Impervious tiles”

** Varia secondo la finitura di superficie
It can vary according to the surface finish
