NEWS | ALPI CHIARO VENATO

code: CSNEW1120

size off: 18,5x24 cm

cost: 1.20 €

**PRINTED AND DIGITAL VERSION AVAILABLE**

SapienStone updates its collection with a new kitchen top and launches its first green design: Alpi Chiaro Venato. This new countertop takes inspiration from one of the most beautiful Italian marbles, from the Valle d'Aosta. Beautiful, deepest dark green with lighter areas and cobweb-like white veining accentuated by the contrasting background color. The natural finish gives the appearance of nature's marble. Alpi Chiaro Venato is a supremely elegant countertop in a distinctive yet very versatile color which can be combined with both light and dark furnishings, and can therefore be installed in traditional or modern rooms, in private homes or public spaces.

**NEWS | CALACATTA MACCHIA VECCHIA
PLATINUM WHITE - PALLADIUM GREY
BLACK DIAMOND - PIASENTINA**

size off: 18.5x24 cm
cost: 2.36 €

PRINTED AND DIGITAL VERSION AVAILABLE

Prosigue imparable el camino de SapienStone, una síntesis perfecta de técnica y estética. Es así como las grandes placas de gres porcelánico visten y cubren cocinas de rara elegancia. Las superficies se vuelven cada vez más sofisticadas y, al mismo tiempo, versátiles. Calacatta Macchia Vecchia es el mármol con sus inconfundibles vetas que embellece la mesa iluminándola con un ligero toque dorado, tanto en el acabado Levigata como Silky. Platinum White, en su blancura natural, representa la sobriedad que no cede ante lo banal. Palladium Grey se presenta como base, solo aparentemente neutra, para la creación de ambientes con un aire retro. Black Diamond, gracias a un juego inteligente de luces y sombras, de claroscuros, plasma la esencia del estilo, la sofisticación y el carácter. Piaseentina, en cambio, con su superficie envejecida, narra historias de una sólida tradición que ahora parecen reclamar un poco de transgresión, sobre todo cromática.

Cleaning tips for kitchen worktops and surfaces

GENERAL INDICATIONS

SapienStone is not recommended for the high chemical resistance and resistance of the surface to dirt and stains and for the reason SapienStone is not recommended for the use of surface integrating backdrops, backdrops, in further facilities cleaning activities, it is always good practice to remove stains with fresh, avoiding surface abrasions and in this way it will be possible to quickly and easily remove any deposits of strong liquid (eg. coffee, tea, red wine) by rinsing the surface even simply with a sponge and just water.

ORDINARY MAINTENANCE

For daily cleaning of the surface, simply use a damp sponge or microfiber cloth. For regular cleaning, the use of a neutral detergent to be used with a soft sponge or microfiber cloth is normally sufficient, using neutral spraying devices.

PERSISTENT STAINS

If the stain remains or is not sufficient to remove the most persistent encrustations, it is possible to intervene locally, as indicated in the table below, using a slightly abrasive sponge then, if necessary, continue the cleaning with a degreasing product.

USAGE PRECAUTIONS

Avoid shocks to the most delicate points of the panel such as sides and edges. Do not pour large quantities of water on the kitchen counter to produce overflows, especially to avoid letting the water seep into the mounting holes and critical points, damaging the furniture below. For all cleaning operations, it is recommended to carry out a preventive test on a small part of material and leave the product on only as necessary.

ADDITIONAL TECHNICAL INFORMATION

Due to the high quality of the surface, the materials in SapienStone, particularly the Dark Marquise series, require greater care than other SapienStone finishes. In particular, harsh abrasive detergents should not be used repeatedly if left to work over an extended period. For further details, please refer to the cleaning and maintenance guide available on the SapienStone website.

The presence of small marks or small holes on the surface of the countertop cannot be considered a defect; they are in fact due to the natural composition of the composite body of the material, which is made up of a high quality composite body of raw materials (quartz, granite and fillings). Even slight variations in the amount of silica in the body of the countertop or in the brightness of the production process of the material, as they cannot be considered as a defect, it should be noted that any replacing of sides could generate differences between new and old sides.

Recommended detergents for kitchen worktops and surfaces
